**ROTO-DISC® Co. INTRODUCES ROTO-CLEAN™ SANITARY SPHERICAL
VALVE THAT HELPS PREVENT LEAKS, JAMS AND PRODUCT
BREAKAGE**

Cincinnati, OH, For Immediate Release – The Roto-Disc® Company introduces the heavy-duty Roto-Clean™ valve for sanitary processing of dry and slurry material. The Roto-Clean™ utilizes the same seat and quarter-turn action used by the Roto-Disc® valve, which has been used throughout the process industry for more than 20 years in tough applications. In just a few minutes and without tools, the Roto-Clean™ can be completely broken down into its basic parts for washing or sanitization. Reassembly is accomplished in just a few minutes as well without the need to readjust tolerances or settings.

Designed with the food and pharmaceutical industries in mind, all components of the Roto-Clean™ are made from FDA compliant materials. Valve is designed for vacuum and pressure applications and for temperatures up to 425°F. Available in 3” thru 12” sizes in 304 & 316 stainless steel, Hastelloy-C and aluminum. Custom connections and adaptors to fit existing connections are available. References are also available for food, pharmaceutical and color compounding.
